Educated, Motivated, Hardworking, and Professional Teammate.

I have an enthusiasm for building creative and dynamic websites with UX and UI at the forefront. I am knowledgeable in responsive design, client and server side coding, systems software, along with debugging and consistently testing web applications to insure that the client gets that best possible website. I have a proven ability to work in a fast-paced, and challenging environment. Along with effectively and efficiently troubleshoot any existing problems. This capability of delivering top-notch customer service and satisfaction has allowed me to create what the client wants, and when the client wants it.
